PROFESSIONAL SUMMARY

Data Engineer with experience building Python and SQL data pipelines, ETL workflows, backend APIs, and automation for analytics and operational systems. Skilled in data validation, reconciliation, query optimization, reporting automation, and API integration across Databricks, PostgreSQL, ClickHouse, MongoDB, and MySQL. Focused on dependable, observable data delivery that turns operational inputs into structured KPIs, insights, and business-ready outputs.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Data Engineering: ETL/ELT, data pipelines, batch processing, data validation, data quality, reconciliation, workflow scheduling, reporting automation, Databricks

Databases: PostgreSQL, ClickHouse, MongoDB, MySQL, Oracle SQL, BigQuery, stored procedures, indexing, query optimization

Backend: FastAPI, Flask, REST APIs, Pydantic, asynchronous Python, API integrations, internal tools

Analytics and ML: Pandas, NumPy, scikit-learn, XGBoost, experiment evaluation, classification, feature engineering

Applied AI: practical AI integrations, LangChain, RAG, FAISS

Engineering Tools: Docker, Git, GitHub Actions, Linux, pytest, Plotly, AgGrid

PROFESSIONAL EXPERIENCE

Data Engineer | ParallelDots | Remote | June 2026 - Present

- Build retail analytics workflows that transform image-annotation data into structured KPIs and insights for downstream business use.
- Develop Python and SQL data pipelines and ETL workflows across Databricks, PostgreSQL, ClickHouse, and MongoDB.
- Support backend and API integrations that reliably move operational data into analytics and reporting workflows.
- Organize and validate data so analytics outputs are consistent, usable, traceable, and ready for business decisions.

Python Engineer | NJ Mutual Fund | Surat, India | June 2024 - May 2026

- Designed and developed FastAPI and Flask backend services supporting analytics platforms, reporting systems, and internal automation workflows.
- Built Python ETL pipelines to ingest, validate, reconcile, and store financial datasets, reducing manual processing by 60%.
- Implemented idempotent reconciliation and audit workflows with retry logic, structured logging, and automated email notifications.
- Migrated Excel-driven processes into scalable Python and SQL pipelines, improving data consistency and operational reliability.
- Improved reporting performance by 50% and reduced data-retrieval latency by 40% through SQL, indexing, and backend optimization.

Data Science Intern | NJ Mutual Fund | Surat, India | January 2024 - June 2024

- Developed backend data models and API endpoints supporting sales and performance analytics dashboards.
- Automated recurring Excel-based reports using Python and SQL, improving accuracy and reducing manual effort.
- Improved data ingestion and processing through SQL tuning and schema optimization.

PROJECTS

Online Payment Fraud Detection | Python, FastAPI, XGBoost, Docker

- Built an end-to-end fraud-detection pipeline using a 6.3M+ transaction dataset, feature engineering, XGBoost, Logistic Regression, and a FastAPI prediction service.
- Handled extreme class imbalance and created a containerized service for real-time transaction scoring; the repository reports ROC-AUC of about 0.96.

ESG Performance Analysis | Python, Pandas, Statistics

- Analyzed ESG and market-performance data using regression, risk analysis, and Monte Carlo simulation; built a workflow covering data preparation, returns, correlation, and Value-at-Risk exploration.

DSA Tracker | React, TypeScript, Vite, Gemini

- Built an interactive learning tool for data structures and algorithms with a TypeScript frontend and Gemini integration.

EDUCATION

Bachelor of Engineering in Computer Engineering | Sarvajanik College of Engineering and Technology, Surat, India | October 2020 - May 2024 | CGPA: 8.00

CERTIFICATIONS

Oracle Cloud Infrastructure Certified Data Science Professional | Oracle | 2025
